

Fun with Water

Water is a simple sensory play material, easy to set up, easy to clean up, and lots of fun for children to explore!

Water play: A simple bucket of water is a super sensory tub. Very young children need nothing more. But add some paint brushes and rollers, and paint the driveway or the side of the house.

Bubble play: Add some Joy or Dawn dishwashing soap, offer a whisk and see how many lovely bubbles you can nix up.

Sail boats: Make boats out of junk bits and pieces and go for a sail!

Measuring volume: Offer some measuring cup, funnels and containers and explore volume and dimension.

Tea party: Add a teapot and cups and saucers for some role play afternoon tea.

Washing up: Let children wash plastic dishes

Car wash: Set up a car wash for toy vehicles

CFCE Program

The CFCE Program is funded by a grant from the MA Department of Early Education and Care. It is managed by Community Teamwork
